## ADVERTISMENT.

Whereas since the decease of Dr. Lockyer, many have been at a loss to know where his true Universal Pill is to be had; which is so famous in all his Majesties Dominions and Plantations, by the cures it hath wrought in the Scurvy, Dropſie, Stone, Consumption, Aches and Lameſſness of the Limbs, all sorts of Agues and Feavers, Gripings of the Guts, &c. This is to certifie, that it is only prepared by Mr. Watts his Nephew in St. Thomas's Southwark; and Mr. Fyge Apothecary without Bifops-gate, London; whom he appointed his only Trustees for the ſame after his Death.

## Rules concerning Husbandry.

**V**hen you would plant or graft, consider where the wind bloweth; if it be in the South, it is very good for that purpose, but if it be in the North or East, it is not good.

It is good to plant or graft generally the Moon increasing in these signs, Taurus or Aquarius in the beginning of the Spring, or latter end of Harvest.

Plant trees for continuance, when the Moon is in Taurus, Leo, or Aquarius.

Cut timber to have it sound, in December, or January, in the wane of the Moon in Aquarius or Pisces.

Prune trees and pull off the moss in the month of January.

Blash hedges and top trees for fuel, that the heads may the sooner grow again, when the Moon is in Aries or Libra, and in her increase.

Set young quick-setts, from September to March.

Remember young trees in the last quarter of the Moon, when she is in Aries, Libra, Scorpio: and in these months, September, November, February.

Set vines in February, March, or September, specially the Moon in Aries, Libra, Scorpio, in her increase.

Set Mole-trees in the midst of February, when the Moon increaseth.

Cut or prune trees in March or April, the Moon in Taurus, Virgo, or Capricorn.

Gather fruit, as Apples, Pears, and the like, at the full of the Moon, in the afternoon, the weather being fair and dry.

Cut down hay presently after the full of the Moon.

Dung ground to prevent the growing of weeds, the Moon decreasing.

Sow Carrot-seeds about the end of February or the beginning of March, the Moon increasing.

Sow Onions and Leeks in February or March, at the wane of the Moon.

Set Cucumbers and Melon seed, not above one inch in depth, from the first of April to the 20 in the increase of the Moon,
